SENIOR POSITIONS

Software engineer/ Technical Lead, Delft

On behalf of my client in Delft, The Netherlands, I am looking for a Software engineer/ Technical Lead. In this position you will work within a team of quality engineers, developers, a technical writer and functional designers. You will work with SCRUM and be responsible for delivering the perfect code together with the overseas teams. You will be a coach for them and therefore find it a challenge to work closely with you colleagues abroad.

Your tasks

- Coordinate and coach the overseas team's day-to-day technical activities.
- Coordinate the development activities between Dutch product management and overseas team's development.
- Helps the team to understand the technical approach and apply the company's online guidelines to ensure that the architectural integrity is maintained.
- Work closely with the product owner/solution architect to understand their needs and designs a solution that fits those needs and act as sparring partner.
- Perform code reviews for your peer developers.
- Design, code and test complex business software applications as part of a SCRUM team.
- Program both new solutions and new functionality in existing solutions, based on business needs.
- Maintain and troubleshoot applications by monitoring, identifying and correcting software defects.
- Stimulate actively the development of knowledge and expertise within the company and inspire your colleagues
- Take ownership for the quality of all assigned software targets and codes.

Your profile:

- You have at least a Bachelor's degree or equivalent level in computer science.
- You have at least seven years' experience of software development in a relevant development environment.
- You are experienced in working with .NET
- You have knowledge of basic business processes like financials and sales.
- You are quick to understand business challenges when explained and can communicate technical solutions to non-technical stakeholders.
- You are an effective oral and written communicator in English.
- You are empathic and enjoy working with people from different cultures.
- You like coming in early to talk with your overseas colleagues.

Application process:

- Detailed CV in English stating exactly duties responsibilities of every stated professional experience
- 2-3 lines description of your thesis
- A recent photo

Senior IPTV Engineer, Munich

On behalf of my client in Munich, Germany, I am looking for a MS SQL Engineer & Architect.

Your tasks

- Define the service roadmap with the product manager and in liaison with the platform partners
- Translate the roadmap into technical description for our platform partner and be responsible for the follow-up of the implementation of those evolutions
- Suggest your own improvements and be able to document yourself and to do some basic troubleshooting in order to do proper qualifications
- Have a good understanding of the platform in order to work on the problems with the right team
- You are the main contact for reporting to and from our partner and be part of the management escalation for critical problems
- Responsible for the design and the supervision of the troubleshooting processes

Your profile:

- You have a Bachelor's degree (in Computer Science or relevant) or the equivalent working experience and strong organizational skills in project and partner management; knowledge of ITIL best practices (or similar methodology) would be a plus
- You have worked several years in a similar position with an operator or vendor field services or in an environment deeply connected to the TV or entertainment industry and you are preferably experienced in supporting multimedia (Data, Voice, TV)
- You have technical skills or knowledge related to the IPTV technologies in Networking, QoS, Multicast, Video Encoding, Content Delivery Network, Middleware, DRM, Service Monitoring Tools, User Interface Design
- You are fluent in English, both spoken and written (it's mandatory as the working language of the company), German would be a strong plus. French would be appreciated

Application process:

- Detailed CV in English stating exactly duties responsibilities of every stated professional experience
- 2-3 lines description of your thesis
- A recent photo
- Language Certificates
- Scanned copies of degrees
